

The core focus of the Energy & Power team is to provide an independent assessment of the Client's risks and provide risk improvement advice to the Client.

At Allied Broking Co. our goal is to create customized insurance policies that fit the need of the client, enable long term financing, increase customer adoption, and are attractive to insurers.

Energy & Power

ENERGY | POWER | CONSTRUCTION | ENGINEERING

ENERGY

We partner with our clients to develop customized service plans, and we'll meet your needs where you do business: onshore and offshore. We'll help identify your unique exposures, with dedicated energy experts performing on-site inspections.

Whether your focus is exploration, construction, production, or refining and marketing — single-location operations, new projects, or a diverse portfolio of integrated assets — our energy experts offer bespoke risk management solutions.

POWER

Whether your focus is generation, transmission and distribution, retail — or a combination of these — our power experts provide risk management solutions that are tailored to your needs.

Allied Broking Co.'s energy division offers our clients what they need most: deep understanding of their industry, environment and operations, extensive and specialised expertise, innovative solutions, superior loss control capabilities, responsive claims handling, substantial insurance capacity and a truly global reach.

CONSTRUCTION

Our highly experienced, specialist team places and co-ordinates major construction insurance programmes. Allied Broking Co. brings added value at every stage of a construction project, from contract review to the development of risk allocation and the marketing strategy, liaison with the project lenders, the design of the policy wordings, the placing of the agreed insurance programme, and ongoing service throughout construction.

We have a broad reach within the international markets, as the provider of innovative solutions for new or non-standard coverage requirements.

ENGINEERING

Our team of engineering specialists has a wealth of experience on the industry's needs. As a result Allied Broking Company is able to provide technically sound, accurate, up to date advice and provide insurance programmes based on a thorough analysis of the client's requirements.

ABC's Energy & Power Division is totally committed to bringing a first class and cost effective service to all of our clients whether the project involves oil, power, petrochemicals, steel or other heavy industry or buildings and civil engineering works such as, dams and bridges.
